

PRESERVING PORTLAND

Public officials need your help to ensure that the City of Portland grows in a way that increases prosperity while preserving its unique character and high quality of life.

What is **Preserving Portland?**

Preserving Portland is a public planning initiative to engage residents and businesses in defining a vision for the community that will serve as a framework for the city's future.

This process will:

- + **Establish a shared vision for the community.**
- + **Evaluate growth and development trends to understand impacts on housing options, land consumption, roads and utility infrastructure, and other city programs and services.**
- + **Recommend policies and strategies to guide land development and prioritize city investments into public infrastructure and municipal services.**

What is a **Comprehensive Plan?**

A Comprehensive Plan is a guiding document that public agencies, residents, employers, developers, and other stakeholders can use to ensure that the City of Portland grows according to a shared vision.

The City of Portland is working in partnership with public agencies, non-profit organizations, local businesses, and neighborhoods to carry out **PRESERVING PORTLAND.**

The success of this plan depends on your participation. **YOU** are part of the team so please share your ideas and spread the word!

Share your vision for the City of Portland!
